# After

**MAISHA MAPYA treats jigger victims for 14 days with potassium permanganate and petroleum jelly. We follow our procedure while monitoring the entire treatment and recovery to ensure our patients get healed. In order to restore and sustain their "NEW LIFE" (which translates to Kiswahili as Maisha Mapya), the fully recovered persons are sensitized over practices of good sanitation, and are supplied with basic items for maintaining personal hygiene (basin, soap etc). Besides treatment Maisha Mapya initiates rehabilitation for the very needy. Aiding for self-reliance is our means to eradicate poverty through reaching out to its root cause i.e. THE JIGGER MENACE.**
